SUMMARY

Successfully delivered end-to-end solutions implemented on Salesforce platform, starting from requirement gathering, to solution design, to post-implementation support. Technical hands-on in SFDC Configuration, Apex Classes, Triggers, LWC, Objects, Data Security, Roles Hierarchy, Permission Sets, Reports and more. Data Migration Experience. Excellent Team member with proven abilities to be a part of the team during the project phase, training & guiding other team members. Data management using Data Loader. Strong written and oral communication abilities.

SKILLS

Salesforce Development

Salesforce.com Apex, Triggers, SFDC Configuration, Data Migration, Asynchronous Apex, Data Security, Report and Dashboard Creation, Rest Api Integration, SOQL/SOSL, Git Version Control, LWC Development, Automation Tools

Cloud Computing

AWS Cloud

DevOps

Terraform, Docker, Jenkins

WORK EXPERIENCE

SFDC Developer/Administrator

Bachem (PWC)

- Used S-docs to create quotations for the client.
- Designed and implemented quotation data in specific required format over PDF.
- Created tables and grand totals based on formulas from the backend over the quotations.
- Involved in discussions for functionalities testing with QA and performed deployments through Bitbucket.
- Worked independently with the client on that project.

SFDC Developer/Administrator

TGF-MECA (PWC)

- Created the Questionnaire for them (LWC).
- Created Users, Permission Sets and Groups.
- Involved in discussions for functionalities testing with QA and performed deployments through Bitbucket.
- Implemented automation through Schedulable Batch Classes.
- Created the list view for the questionnaire records through LWC component and multiple modal boxes as per requirement.
- Developed Email Templates, page layouts, custom objects, and relationships as required.
- Implemented OTP authentication for external users as per client requirements.

SFDC Developer/Administrator (HealthCloud)

Help At Home (Avalere Health)

- Used OmniStudio to create health assessments for the patient.
- Designed and implemented Care plans and Caregivers.
- Created Users, Permission Sets, and Groups.
- Involved in discussions for functionalities testing with QA and done deployments through Bitbucket.
- Implemented automation through triggers.
- Worked on a POC to populate the Encrypted field values and implemented that in the real environment.

SFDC Developer/Administrator

Pre-Sales Management System (Kanchan Metals)

- Requirement understanding & effort estimation.
- Designing & Implementation.
- Build custom objects and fields.
- Created users, profiles, and permission sets.
- Created validation rules and approval processes.
- Built input forms, progress bars, and Activity components in Lightning components using LWC.
- Planned for Testing and UAT Migration.
- Implemented automation through triggers/Workflow.

Development and Support for Onboarding Module in HRMS

Internal, AWC Software, Noida

- Created pages with lightning components (Aura and LWC) to manage all functionalities of the onboarding module.
- Worked on Admin configuration and security to manage all the users.
- Built reports and Dashboards.
- Created automation via declarative approaches (Process Builder/Workflows and flows).
- Data import using Data Loader.
- Production migration using Visual Studio package.xml and changesets.
- Unit testing for developed code and delivering changes for User acceptance testing.
- Developed SOQL queries to get data from different related objects.

EDUCATION

G.L. Bajaj Institute of Technology and Management

B.Tech - Information Technology
