PROFESSIONAL EXPERIENCE

Software Engineer

2021 September to current

Project 1: Gwinnett County (GC)

- Worked on Gov. Grants Enterprise Grant Management System a Product of REI systems.
- Developed custom objects, fields, page layouts and record types to meet complex business requirements and improve data management.
- Designed and implemented Visualforce pages to enhance user interface and streamline user interactions within the Salesforce platform.
- Used tools like Data Loader and Workbench for bulk data import/export, updates and clean-up.
- Involved in Creating Profiles, Permission sets, Users, Sharing rules and roles.

Project 2: South Carolina Attorney General (SCAG)

- Developed new functionality of DocuSign as per the information provided by client.
- Managed user profiles, permission sets, role hierarchy and sharing rules to control data access.
- Designed and implemented automation using Workflow Rules, Process builder and Approval Process.
- Developed and maintained Apex classes, triggers, and batch Apex for business-critical automation.
- Usage of Static resource and Email template generation to use in UI pages and send email accordingly to business flow.

Project 3: Alaska

- Build custom Lightning App and Record pages and developed reusable lightning Components.
- Utilized Lightning Data Service (LDS) in LWC for seamless data operations without the need for Apex code.
- Fetched metadata and picklist values dynamically in LWC using lightning/uiObjectInfoApi and getPicklistValues.
- Utilized Salesforce Lightning Design System(SLDS) and web based technologies(HTML,CSS) on UI needs.
- Involved in deployment activities in Sandbox and Production environments using COPADO, Java tool and Changeset.
