WORK EXPERIENCE

Tata Consultancy Services

Project – AGL Energy Limited

Client: AGL

Role: Salesforce Developer

SINCE JAN 2022

Nagpur, Maharashtra

- AGL Energy Ltd is an Australian listed public company involved in both the generation and retailing of electricity and gas for residential and commercial use. It is one of the "big three" retailers in the National Electricity Market.
- Implemented sharing and visibility controls for records, fields, and objects using Org-Wide Defaults, Role Hierarchy, Profiles, Sharing Rules, and Page Layouts, enhancing data security and improving user access efficiency by 25%.
- Automated key business processes with Apex Triggers and Lightning Flows, streamlining workflows and reducing manual tasks, saving an average of 15 hours per week.
- Enhanced software maintainability by utilizing Salesforce's low-code features (Lightning App Builder, Page Layouts, Validation Rules, Custom Settings, Metadata, and Custom Labels), simplifying code structure.
- Developed and optimized unit test classes for robust deployments, ensuring 75% test coverage and boosting deployment success rates.
- Diagnosed and resolved critical production bugs, delivering timely fixes with a 50% faster turnaround, minimizing downtime and maintaining system stability.

ROLES & RESPONSIBILITY

- Understand the client requirements and estimating and prioritizing the development tasks to meet expectation and deadlines
- Use standardization like Process Builder, Workflows, Assignment rules, Approval process, Email templates, App builder and Validation rules
- Use Sharing and security like Profiles, Permission sets, Sharing rules, Page layouts, Record Types, Lookup & Master-detail relationships, Junction object, Custom metadata, Custom settings.
- Use server-side customization development of synchronous and asynchronous like Apex, Trigger, Batch Apex, Future method, Cron job, Queueable, Scheduler, SOQL.
- Expose API with Third Party using Connected App, Named Credentials.
- Unit testing of the code & code coverage by 75% for deployment.
- Involve in deployment using Changeset, VS Code, Git.
- Follow good coding standard, code optimization to avoid Governor Limit issues.
- Error handling, Code Optimization, Bug fixes, Salesforce Updates consideration
- Functional & Technical code review.

- Complete the documentation like Release notes, Impact Analysis, Post/Pre deployment
- Research, diagnose, troubleshoot and identify the root cause of application issues if any.
- Client/Internal meetings on regular basis via. Teams
