WORK EXPERIENCE

V2Solutions

Software Engineer (April 2024 - Present)

Associate Software Engineer (Nov 2021- April 2024)

Trainee (July 2021 - Nov 2021)

Project1

Environment: Omnistudio and Experience Cloud

Responsibilities:

- Responsible for developing **Lightning Web Components (LWC)** to meet specific requirements for both portal users and internal users.
- Responsible for developing **OmniScripts**. This involved creating a user-friendly interface for guiding users through complex processes.
- Worked on **apex class** to support OmniStudio, particularly focusing on **remote actions** to enable communication between the frontend and backend systems. This helped enhance the overall functionality and efficiency of the application.

Project2

Environment: Sales Cloud & Experience Cloud

Responsibilities:

- Worked on the project as a Salesforce Developer & responsible for customization, development and resolving the data discrepancy in the project.
- Worked on **Web Service** using **REST API** to integrate with external system.
- Created custom **Apex Triggers, Apex Class, Asynchronous Apex and Test Class** to automate the requirement.
- Successfully designed and implemented **Slack** integration with Salesforce, enhancing real-time communication and collaboration between different teams.
- Configured **airslate** in salesforce org, implemented document workflows and data synchronization.
- Orchestrated the successful integration of **360SMS** with Salesforce, facilitating seamless communication via SMS within the Salesforce environment.
- Responsible for creating flow diagrams of the system(project) and documents related with the development of the functionality.
- Created **Experience Cloud Site**, implemented and tested all the project related functionality from the site.
- Troubleshooting and fixing the bugs.

Project3

Environment: Sales Cloud

Responsibilities:

- Proactively identified and resolved discrepancies within project workflows, ensuring alignment with organizational objectives and quality standards.
- Maintained up-to-date documentation of Salesforce ER diagrams, ensuring accuracy and alignment with evolving project requirement.
- Responsible for data migration and worked on **package manager & automations**.
- Developed and maintained comprehensive documentation to track and report on project discrepancies.
- Responsible for updating and making changes to already existing applications.
