OBJECTIVE

Results-oriented professional with 3.2+ years of comprehensive experience in Salesforce, Apex programming, LWC, Sales Cloud, Health Cloud and Java. Proven ability to design, develop, and implement customized solutions on the Salesforce platform, leveraging expertise in Health Cloud configuration, Apex coding, and front-end development. Seeking a challenging role where I can utilize my skills to drive innovation, optimize processes and contribute to the success of dynamic projects.

SKILL SET

- | | | |
|----------------------------|------------------------|------------------|
| ▪ Apex | ▪ Salesforce | ▪ Sales Cloud |
| ▪ Trigger | ▪ Administration | ▪ Health Cloud |
| ▪ Lightning Web Components | ▪ Lightning Flow | ▪ Service Cloud |
| ▪ Asynchronous Apex | ▪ Salesforce Inspector | ▪ Data Migration |
| ▪ Visual Studio Code | ▪ Coapdo | ▪ GitHub |
| | ▪ SOQL | ▪ DataImporter |

WORK EXPERIENCE

- Extensive expertise in building Custom Objects, Custom Fields, Picklists, Record Types, Validation Rules, Workflow Rules, Approval Processes, Custom Tabs, Queues, Public Groups
- Skilled in data management, including importing data using Import Wizard and Apex Data Loader
- Proficient in optimizing database operations through efficient SOQL code, ensuring adherence to Salesforce governor limits
- Expertise in developing and customizing Salesforce Reports and Dashboards, with knowledge in Salesforce Health Cloud: known for strong teamwork and adaptability in diverse environments
- Collaborative team player with track record of delivering efficient and scalable technical solutions and Committed to maintaining code quality and adhering to best practices for optimal system performance

CERTIFICATIONS

- | | |
|---|-----------------------------|
| • Salesforce Certified Platform Developer I | • Health Cloud Certified |
| • Salesforce Certified Administrator | • Full Stack Java Developer |
| • Certified Copado Fundamentals | |

EDUCATION

Master of Computer Application

YCMOU

2022 – Pursuing

Bachelor of Computer Science

Shivaji University

2018 – 2021

PROJECT

- **Software Industry ERP (July'21- May'22) – Mind Spark Technology**

The system will take care of all the Project activities like managing each Project's attendance, the number of leaves taken by that particular Project and calculation in a very quick manner and it avoids Data storing is easier.

- Design and developed SFDC Administrative tasks like creating Users, Roles, Profiles, Standard Objects like Accounts, Contacts, Leads, Campaigns, Opportunities, Dashboards and Reports.
- Creating Custom Objects, custom fields with master-detail relationships and lookup relationships, Junction objects, process builder, Approval process, Reports, Dashboards, Tasks, Implemented security and sharing rules at Object, Field, and Record level for different users at different levels.
- Matching Rule, Duplication Rule, Sharing Rule, Validation rules, Role Hierarchy, OWD, Listview.

- **Uber Eats (Jun'22 – Dec'23) – Enzigma Solutions LLP**

Uber Eats is a food delivery platform and mobile application operated by Uber Technologies Inc. It allows users to order food from a wide range of restaurants and the orders are delivered to their doorstep.

- Enhanced and optimized Apex Classes and Test Classes to meet coding standards, achieving high quality code that is scalable and maintainable.
- Employed Batch Classes, Queueable Apex, and Future methods for asynchronous processing, effectively managing complex business logic and improving system performance.
- Configured and fine-tuned Workflow Rules, Validation Rules, Approval Processes, Process Builder, workflows, and Lead Assignment Rules to streamline processes and maintain data integrity.
- Designed and executed intricate Lightning Flows to automate business processes and align with organizational objectives.
- Crafted efficient SOQL queries within Apex Classes and Triggers to retrieve and manipulate data, ensuring seamless application functionality.
- Collaborated closely with business POCs throughout the project lifecycle, from requirement gathering to Development, Testing, Implementation, and Documentation.
- Customized Lightning Web Components to display UI errors based on predefined data conditions, enhancing user experience and usability.

- **Dario (JAN'24 – SEP'24) – Enzigma Solutions LLP**

Dario Health is a leading digital health company revolutionizing how people with chronic conditions manage their health through a user-centric multi-chronic condition digital therapeutics platform.

- Data Loader, Dataimporter Data Import Wizard, Salesforce Inspector, Workbench, Gearset, Change Set, salesforce to salesforce integration, and SFDX (importer/export) for efficient data management
- Business Understanding of Health Cloud Features (Care Management, Care Plan, Care Program, Health Timeline, Patients, Remote Monitoring)
- Collaborated closely with business POCs throughout the project lifecycle, from requirement gathering to Development, Testing, Implementation, and Documentation.
