### SUMMARY

- Having 4 years of experience in IT Infrastructure, cloud management, Application development & support and Linux Administration.
- Experience in Microsoft Azure and AWS Cloud Platform.
- Proficient in managing and scaling containerized environments using Kubernetes.
- Experience in deploying CI/CD pipelines.
- Basic insights and hands on knowledge in SQL databases.

### TECHNOLOGY EXPERIENCE

Operating Systems:	Windows, Linux
Cloud platforms:	Azure, AWS
CI-CD Tools:	Azure Pipeline, Code pipeline-code commit, code deploy
Container orchestration:	Kubernetes
Cloud Automation Tool:	Terraform with Azure
Monitoring Tool:	NewRelic
Ticketing Tool:	Ivanti Service Manager
IDE:	Open Lens
Source control tool:	GIT Hub
SQL Platform:	Microsoft's SQL Server

### PROFESSIONAL EXPERIENCE

#### Awan Infotech, Chennai, India

Client	Ivanti
Project Name	Ivanti IT Service Management Software

#### Cloud Analyst

[Jun 2024 - Till Date]

- Designed and implemented Infrastructure as Code using Terraform, automating the deployment of AZURE resources, ensuring consistency and efficiency.
- Managed CI/CD pipelines using Azure DevOps, streamlining the application deployment process for increased automation and efficiency.

#### Cloud Consultant

[Apr 2023 - Jun 2024]

- Technical insights in Kubernetes management such as handling pods, nodes, deployment sets and Kubernetes clusters.
- Exposure in handling heavy loaded software application hosted in cloud platform predominantly in Azure and Containers.

**Senior Cloud Engineer****[Oct 2021 - Apr 2023]**

- Managed various Azure resources, including virtual machines, virtual networks, Load balancers, Application gateways and storage accounts, demonstrating proficiency in handling core Azure services.
- Configured and managed load balancing solutions, including nginx plus load balancer, Azure Application Gateway, and Azure Load Balancer, ensuring optimal traffic distribution and secure communication.
- Configured the ELK (Elasticsearch, Logstash, Kibana) stack and New Relic for application logs monitoring and analysis, providing a comprehensive solution for log management.
- Installed and configured SSL certificates on IIS servers, enabling secure communication over HTTPS.
- Configured Nginx as a load balancer with traffic routing based on specific requirements, showcasing expertise in diverse web server technologies.
- Worked on Clustered architecture in Azure (AKS)

**Cloud Engineer****[Dec 2020 - Oct 2021]**

- Providing an ideal support for an application hosted in a cloud platform in both front end and backend.
- Fundamental Knowledge in monitoring tools such as New Relic and Kibana.
- Managing business class email hosting solutions for software applications such as Rackspace and Cloudflare.
- Basic knowledge in SQL databases such as DDL, DML and DQL.
- Expertise on AWS Technologies such as EC2, Load balancer, Target groups and Route53 for the application requirement.
- Knowledge in basics of VPN issues troubleshooting such as monitoring the status of the VPN tunnel and clearing the network traffic.

**ICICI Bank, Chennai, India****[Sep 2019 - Jun 2020]****Assistant Manager**

- Managed PB-eRelationship Management, a digital platform for customer interaction and relationship management.
- Implemented strategies to enhance the customer engagement and satisfaction through the PB-eRMsystem.
- Collaborated with cross-functional teams to integrate PB-eRM into existing workflows, streamlining processes and improving efficiency.

**AWARDS****Special Performance on Time****AWAN INFOTECH PRIVATE LIMITED****[2023-04-15]**

Recognized with the 'SPOT' award for outstanding performance in the project at AWAN, resulting in promotion to Senior Cloud Consultant.

## EDUCATION

### **MBA in Finance and Marketing**
