IT Skills: SOQL, SOSL, HTML, JavaScript, Apex Class, Triggers, Batch Class.

Lightning Web Components: Decorators, Properties, Lifecycle Hook, Events.

Clouds: Sales Cloud, Service Cloud, Experience Cloud.

Tools Used: Workbench, Data Loader, VScode, Github, Jira, Postman.

Certifications:

- Salesforce Certified **Platform Developer 1** (PD-1)
- Salesforce Certified **Data Cloud Consultant**.

Education:

BACHELOR OF ENGINEERING from RTMNU Nagpur In 2017
with a **7.31 CGPA**

Work Experience

Software Engineer
Last Mile Innovation Private Limited

June 2020 to May 2024

Senior Software Engineer
Amdrodd Technologies Private Limited

July 2024 to Dec 2024

Project: Evans (Transportation & Logistics)

Role: Salesforce Developer

Team Size: 7

Roles and Responsibilities:

- Designed and configured dynamic custom **reports and dashboards** tailored to specific user roles, enabling data-driven decision-making across the organization.
- Developed **Apex test classes**, achieving high **code coverage** from 75% to 95% to ensure application reliability and compliance with Salesforce deployment standards.
- Maintained code for **Apex Classes, Triggers, and Controllers** for smooth Business Requirements.
- Built **Lightning Web Components** using **@track** for reactivity and **@wire** for server-side data fetching.
- Performed **data imports and updates** using **Data Loader**, ensuring accurate mapping to objects during initial **data migration** and batch operations.
- Worked on deployment activities utilizing **Change Sets and Salesforce CLI**, streamlining release management and ensuring consistent environment synchronization.

Project: Schembri PT (Online Nutrition & Training Programs)

Role: Salesforce Developer

Team Size: 9

Roles and Responsibilities:

- Configured and customized Salesforce **Experience Cloud sites** to deliver a cohesive and intuitive self-service experience for **external users**.
- Customized **page layouts and search layouts to organize fields**, custom links, related lists, and other components on a record detail and edit pages.
- Designed secure data access using **Sharing Sets and Share Groups**, allowing external users to view only the records related to their account without exposing internal data.
- **Customized Lightning templates and components** to build intuitive landing pages and dashboards within the portal.
- Diagnosed and resolved defects during **QA and UAT phases**, ensuring high-quality deliverables with minimal **post-production issues**.
- Participated in Scrum Planning (**Agile methodology**), Daily Scrum.

Project: Atlas Investment Management (Financial Services)

Role: Salesforce Developer

Team Size: 9

Roles and Responsibilities:

- Performed the roles of **Salesforce Developer and Administrator** in the organization.
- Implemented **custom validation rules, custom formulas, Email Templates, Assignment Rules, and auto-response Rules** for Leads.
- Created **workflow rules** and **Process Builder and Flows** to implement business logic.
- Implemented code based on understanding limitations and **Governor limits**.
- Worked on creating and assigning **Profiles, Object-level Security, field-level security, Roles, and Public Groups** for the users.
- Created and updated **Visualforce pages** with Apex controllers for UI and document rendering tasks.
- Integrated with third-party external systems by consuming **REST APIs** and handling **JSON** payloads for seamless data exchange between platforms.
- Used **SOQL & SOSL** for data manipulation needs of the application using platform database objects.
- Implemented **Batch Apex, Future Methods, and Schedulable Apex** to handle large data volumes and **asynchronous processing**.
- Maintained **CI/CD pipelines, managed code versions**, and handled branch strategies using **GitHub**.
