## PROFESSIONAL EXPERIENCE

### Voyager Web Solutions Pvt Ltd, Salesforce Developer

July 2021 – Present

**1. Insurance Management Project:** *Developed and optimized a comprehensive insurance management system, enhancing data integration and automation.*

- ▶ Utilized Data Loaders and Data Import Wizard for efficient data migration and integration.
- ▶ Designed and implemented security models using Relationships, OWD, Profiles, and Permission Sets to ensure data privacy and compliance.
- ▶ Developed and optimized automation tools including Workflow Rules, Process Builder, and Flows for streamlined business operations.
- ▶ Created custom Apex classes and triggers to handle complex business logic and automate tasks.
- ▶ Employed SOQL and SOSL for efficient database querying and data manipulation.
- ▶ Wrote and maintained test classes to ensure code quality and coverage.
- ▶ Managed DML operations while adhering to Salesforce governor limits and implementing bulkification techniques.

**2. Seminar Management Project:** *Designed and implemented a seminar management solution, improving user experience and operational efficiency.*

- ▶ Designed and developed Lightning components (LAC, LWC) and Visualforce pages to enhance user interface and user experience.
- ▶ Implemented robust security models to control data access and ensure compliance.
- ▶ Automated various business processes using Apex, Workflow Rules, and Process Builder.
- ▶ Developed and maintained Apex classes, triggers, and batch processes for seamless data processing and integration.
- ▶ Conducted data migration and integration tasks using Data Loaders and Data Import Wizard.
- ▶ Ensured high code quality through comprehensive test classes and adherence to Salesforce best practices.

**3. Dynamic Shopper Experience Project:** *Designed and implemented a personalized e-commerce platform using Salesforce Commerce Cloud, driving customer engagement and increasing sales conversion.*

- ▶ Utilized Data Loaders and Data Import Wizard for efficient data synchronization between Salesforce Commerce Cloud and Salesforce CRM, ensuring accurate and up-to-date customer and inventory data.
- ▶ Designed and implemented security models using Relationships, OWD, Profiles, and Permission Sets to maintain data security and compliance across integrated platforms.
- ▶ Developed and optimized automation tools including Salesforce Flow, Process Builder, and custom Apex triggers to automate personalized marketing campaigns, order processing, and inventory updates.
- ▶ Created custom Apex classes and Lightning Web Components (LWC) to handle complex business logic for personalized product recommendations, dynamic content delivery, and automated discount applications.

- ▶ Employed SOQL and SOSL for efficient querying of customer and product data, enabling real-time personalization and reporting.
- ▶ Wrote and maintained test classes to ensure high code quality, achieving over 90% test coverage and adhering to Salesforce best practices.
- ▶ Managed DML operations and optimized the performance of bulk data processing, ensuring adherence to Salesforce governor limits while maintaining system efficiency during peak shopping periods.

## **EDUCATION**

Savitribai Phule Pune University— B.E (computer science)— 7.98 sgpa

## **HOBBIES AND INTERESTS**

- ▶ Salesforce Administrator User Group Leader
- ▶ Mentoring via the Trailblazer Mentorship program
