- AI Python Programming Participation Certification.

PROJECTS

Client: Warehouse Stock Management System

Description: In project where we have implemented and developed custom apps using force.com for Stock Management System Stock management is a process within the warehouses, where Warehouse members basically receive the stocks from the vendor and store them in designated locations across world within the warehouse site. As and when these stocks are required for a project, they are allocated against the project and later shipped out to the field. A tool is required to properly manage this process and to allow for easier reporting of the allocated and unallocated stocks at the product and location level. Stock allocates to vendor to site then application different functionality like checking stock availability, provide stock to project, and shipping stock to project field All these functionalities are implemented using the process builder, trigger, test class, and implemented aura component for the responsive and dynamic user interface.

Roles & Responsibility:

- Design requirement documents and functional document with the development team.
- Build and maintain workflow and validation rules, customization of page layout and record types.
- Uploading data from CSV file into Salesforce using Data Loader and monitor data quality and integrity.
- Designed custom reports and dashboards and created custom report types.
- Development of Apex classes and Triggers for various functional needs in the application.

Client: Support Pay

Description: Support Pay, where we have implemented and developed custom apps using force.com which enables parents to manage, track and pay child support while sharing additional expenses such as medical, education & childcare. Child maintenance is paid directly or indirectly by parents for the care and support of children of a relationship that has been terminated, or in some cases never existed.

Roles & Responsibility:

- Contributed to the development of Salesforce solution - Cloud Console Application for tracking and resolving customer inquiries, meeting project scope and client expectations.
- Assisted in analyzing business and technical requirements and designing standard objects of Salesforce.com for Customer Care Portal module / application based on project specifications.
- Designed Custom Objects and developed and deployed Apex Classes, Controller Classes and Apex Triggers for various functional needs of the application.
- Created a Visual Force page to implement custom search functionality as well as validation rules, workflow rules to meet the functional requirements.
- Participated in Scrum Planning (Agile methodology), Daily Scrum & Apex test classes for unit testing to ensure maximum code coverage.

EDUCATION

- MBA. Pass out 2020 – Nagpur RTMNU University with CGPA 7.50 CGPA.
- B. E. Pass out 2016– Nagpur RTMNU University with CGPA 7.69 CGPA.

LANGUAGES

English, Hindi, Marathi.

DECLARATION
