Career Objective: Experienced Salesforce Developer with 3 years of hands-on expertise in agile teams, specializing in Salesforce development using LWC and Apex. Adept at crafting efficient custom. Seeking a role to leverage my skills, drive business growth, and further advance my career in the Salesforce ecosystem.

Professional Work Experience

Software Engineer / Application Development Analyst, Accenture

June 2023 – Present

- Engineered and deployed custom solutions with Lightning Web Components (LWC), Apex, and Flow Builder to streamline Salesforce Field Service operations.
- Steer the implementation of commission and discount tracking features, boosting financial transparency and precision, and ensuring seamless Multi-Technician commission distribution as per client specifications.
- Developed robust Salesforce Apex code and comprehensive test classes, utilizing asserts to validate functionality and maintain 80% code coverage, ensuring high-quality, reliable solutions and code integrity.
- Developed responsive user interfaces using LWC and Salesforce Lightning Design System (SLDS), significantly enhancing user experience and application performance.
- Exhibited strong debugging and coding skills to resolve complex backend and frontend issues.
- Optimized code to enhance performance by 20% and achieved a 90% code quality score through static code analysis by reducing Blocker, Critical, and Major Issues.
- Earned the Accenture ACE award twice for exceptional contributions in delivering client value within the Service Cloud and Field Service project teams.

Associate Software Engineer / Application Development Associate, Accenture

February 2022 – May 2023

- Developed bespoke solutions using Lightning Web Components (LWC) in Salesforce Service Cloud to elevate functionality of Salesforce Customer Relationship Management (CRM).
- Implemented critical client features such as Relocation, Collections, and Cancellation to optimize customer service processes.
- Streamlined customer interactions and boosted service efficiency for agents by 35% by leveraging Salesforce Service Cloud and Flows.
- Ensured efficient project delivery by collaborating within Agile and Scrum frameworks.
- Supervised Salesforce release processes with Copado, ensuring smooth and error-free deployments.
- Contributed to CI/CD pipelines using Bit bucket and managed agile workflows through Jira.

Software Engineer Analyst, Capgemini

March 2021 – June 2021

- Enterprise Content Management, Python, Java and Tableau.

Highest Education Qualification

Bachelor of Engineering

Chameli Devi Group of Institutions, Indore. (RGPV University, Bhopal)

July 2016 – July 2020

7.43 CGPA
