SUMMARY

A Salesforce developer with 3+ years of corporate experience in Classic & Lightning with Apex while working for Capgemini and open for taking up a challenging and growth- oriented job where I can further enhance my skills and put in my maximum efforts in the assigned work and to be an active participant in organization's development.

TECHNICAL SKILLS

Apex Classes	LWC	Data Loader
Triggers	Security Configurations	Asynchronous Apex
SOQL	Flows	Lightning Components

PROFESSIONAL EXPERIENCE

Global Payments (Capgemini Internal Projects)

April 2021 - Oct 2021

- Developed a comprehensive banking framework by creating custom objects, utilizing standard objects, and implementing formulas and roll-up summaries.
- Designed and implemented Apex triggers to enhance functionality.
- Worked extensively with master-detail and lookup relationships.
- Ensured robust security implementation across the platform.
- Adhered to Salesforce coding standards and best practices to maintain high-quality code.

MUFG BANK LTD

Nov 2021 - Present

- Involved in gathering and analyzing business requirements, actively participating in sprint planning to meet project objectives.
- Analyzed client business processes and contributed to creating the necessary application and data models.
- Implemented business requirements using custom objects, tabs, fields, Apex, Lightning Web Components (LWC), Lightning events, Lightning Data Service, Apex classes, and triggers.
- Customized page layouts for Opportunity, Contacts, and Accounts based on user profiles, and created permission sets as needed.
- Worked with standard Salesforce features such as objects, workflow rules, profiles, and roles to meet business needs.
- Defined lookup and master-detail relationships, and created junction objects to establish connectivity between objects.
- Managed user roles, security, and profiles to ensure proper access control.
- Worked extensively with standard and custom objects, fields, record types, page layouts, roles, profiles, and validation rules according to project requirements.
- Utilized Data Loader for efficient import, export, update, and deletion of large data sets, ensuring data accuracy and integrity.
- Adhered to Salesforce coding standards and best practices to maintain high-quality code.
