🎯 OBJECTIVE

Aspiring to utilize my proven expertise in Salesforce integration, customization, and implementation to drive efficiency and effectiveness in client projects, while continuously expanding my skill set and staying updated with the latest Salesforce technologies.

💼 EXPERIENCE

Salesforce developer 1 Feb 2022 - Present
Greytrix India Pvt. Ltd (2.11 Years)
- With 2.11 years of experience at Greytrix, I spent 1.3 years on the Services team and 1.8 years on the Product team. On the Services team, I was responsible for handling a wide range of Salesforce client requirements, while on the Product team, I contributed to the development of a managed package for integrating various Sage ERPs, including Sage 100, Sage 300, Sage 300C, Sage X3, Sage Intacct, and Acumatica.
- Worked extensively on the AppExchange product GUMU™ SAGE ERP Integration for Salesforce.
- Developed and implemented Salesforce solutions based on client specifications and requirements.
- Successfully completed 11+ live projects, focusing on business logic customization and implementation.

🔧 PROJECTS

PDF
- Developed a PDF download functionality for the order object using Visualforce pages and Apex within the GUMU product. This feature enables users to effortlessly download their order information with a single click.

Field Set datatable

Designed and implemented a dynamic Field Set DataTable, allowing users to easily add fields to the field set, with those fields automatically displayed as columns in the datatable. Enabled functionality for selecting one or multiple accounts simultaneously and breaking the linkage between Salesforce and Sage ERP seamlessly.

Quick Line Entry

Developed the Quickline Entry functionality for Sage 300c and Acumatica, enabling users to add multiple products to Orders and Quotes. Streamlined the process for efficient product management on these platforms.

Quote Object Promotion

-Developed a trigger to automatically promote the quote object in Sage 100, Sage 300, Sage 300c, and Sage X3 upon the creation of a new quote. This ensures seamless integration and data consistency across systems.

ACHIEVEMENTS

- 1. 4 - 5 star client reviews for exceptional performance on AppExchange for GUMU™ Product.
- 2. I actively contribute to the Salesforce Community, particularly under the name of Greytrix. I help users by answering questions and offering solutions to complex Salesforce issues.
- 3. Winner in Hackathon: - Developed a E learning module for Greytrix Pocket HRMS product that allows users to upload PDF , Videos and text. Our AI system automatically extracts text from the uploaded files and generates questions based on the content, significantly enhancing user experience.
