PRACHI DANTRE

SALESFORCE DEVELOPER

PROFILE SUMMARY

- Experienced Salesforce developer with 2.7 years of hands-on experience in developing and customizing Salesforce applications.
- Skilled in designing and implementing solutions that optimize business processes and enhance user productivity.
- Proficient in Apex, Flows, Visualforce, Lightning web components and Salesforce integration.
- Led initiatives to monitor and enhance the performance of intricate Salesforce applications, focusing on code optimization and query tuning.

WORK EXPERIENCE

Accenture (Project Domain: Banking and Investment)

Advanced Application Engineering Analyst
(01/06/2024 - Present)

Client- Truist Bank

Developed a comprehensive set of user stories for the project, detailing user needs and system requirements to guide the development process. These user stories encompass various scenarios and use cases to ensure that all critical aspects of the user experience are addressed.

Utilized Salesforce REST API to integrate external systems and streamline data exchange, enhancing overall system functionality.

Designed and executed efficient Batch Jobs to maintain data integrity.

Created Apex classes and Triggers for complex business logic and data manipulations in Salesforce.

Implemented custom Apex and standard Salesforce Validations for data accuracy.

Leveraged SOQL for data retrieval and manipulation, enabling data-driven decision-making.

Advanced Application Engineering Associate
(06/11/2022-30/05/2024)

Client - M &G Investments UK

- Developed and implemented Lightning Web Components (LWC) and Aura Components to enhance user interface and user experience.
- Developed an application named Org Certificate Status Monitor to keep track of Salesforce certificates approaching expiration.
- Worked as a Pull Request (PR) Approver and Reviewer.
- Collaborated with business analysts and end users to gather and analyze requirements for Salesforce solutions.
- Managed complex Salesforce deployments, including configurations and code, to ensure seamless transitions between environments, and developed a robust deployment pipeline for efficient and controlled releases.
- Design and implemented advanced data solutions within Salesforce, including data modeling, ETL processes, and data migrations.
- Developed enhanced email message monitoring functionality for all connected Sandboxes. This feature leverages connected apps and REST integration to provide effective monitoring.
