Programming languages:	Apex, LWC, Lightning, jQuery, Java.
Web Technologies:	HTML, XML, Visualforce, JavaScript, CSS.
Databases:	Oracle, MySQL
MS-Suite:	Word, Excel.
Operating systems:	Microsoft Windows (11)

PROJECT SUMMERY

- ✓ **Title** : Real Estate
- ✓ **Client** : NestWay
- ✓ **Role** : SFDC Developer
- ✓ **Environment** : salesforce.com, Apex, VisualForce, SOQL&SOSL, Data loader, Eclipse IDE, controllers.

PROJECT DESCRIPTION:

The purpose of this project is to build a App in force.com platform which can be used to find a best real estate or finding a better properties.

RESPONSIBILITIES:

- Responsible for **requirements gathering** by coordinating with the business analysts, developers and project managers, in order to better customize, and utilize the full functionality of the Salesforce.com CRM solution.
- Deployed Salesforce **apps** from **AppExchange**.
- Efficiently worked with standard Salesforce.com objects like **Accounts, Contacts** along with some custom objects.
- **Implemented Validation rules, Page Layouts, Record Types, Field Set, and Permission Set.**
- Managed the **Role Hierarchy, Security and Sharing Model** by implementing **security and sharing rules at object**, field, and record level for different users at different levels of organization.
- Designed, developed and deployed the **Custom objects, Page layouts, Custom tabs, Components.**
- Proactively created **Apex Triggers** and **Apex classes** and also developed and managed complex **workflows, approvals, validation rules, assignment rules** and system triggers.

- Defined the **lookup relationship** and **master-detail relationship** on the objects that helps in associating the records and defining a **parent-child relationship** in which the master object controls certain behaviours of the detail object respectively.
- Created and Customized **Custom Objects, Formula Fields, Cross Object Formulas, Roll up summary fields, Validation rules, Dependent Picklists.**
- Effectively created the **Picklists, dependent Picklists and junction objects** to establish the connectivity among objects.
- **Document the configuration** and development changes and follow the plan during the **release process.**
- **Reviewed the code** and other components developed by the team and also performed functional Testing.
- Innovate and drive development of technical knowledge around the Salesforce.com technologies.
- Participated in end-to-end **application design, development, testing,** implementation and support.
- Write **unit** and **integration** tests to ensure those features never break.
- Serve as **mentor** to less-experienced developers.
- Designed and implemented a custom application on Force.com for project management.

✓ **Title** : **School Management Application**
 ✓ **Client** : **Meridian International School, Ukraine.**
 ✓ **Role** : **SFDC Developer**
Environment : **salesforce.com, Apex, VisualForce, Triggers, SOQL&SOSL, Data loader, Eclipse IDE, controllers.**

PROJECT DESCRIPTION:

Meridian International School is using salesforce.com as the system of record for student Admission, Managing the process from prospect to mechanism. The application is managed through the qualification, acceptance, finance and matriculation. The portal is implemented with the custom visual force pages. Whenever the student wants to register we are giving login and registration forms in online. Whenever student register in portal it will creates lead and when it meets certain criteria we are using the trigger here for converting the lead automatically.
