PROJECTS

Pharmaceutical Appliances Management

Dec'22-Present

- Aura Components and Apex were used to create an app on Salesforce Org that allows users to create a Quotation of Pharmaceutical Appliances, deliver to the Hospital's and Clinics, and generate contract to provide services.
- We have integrated this project with the **CONGA CPQ**
- Worked as a Salesforce Developer and CPQ Admin in this live project.
- Handled the **Git** Branching and deployed some Major Release to Production using **ANT** Tool

Manthan Classroom

Jan'22-Mar'22

- Designed and built a **multi-purpose website** where people can co-ordinate together to perform group activities. Teachers can give assignments and can set it with different Level of difficulties.
- In terms of software, We used HTML, CSS and JS to maintain the frontend and connected to MongoDB to maintain the database.
- Played the role of **Group Leader** and **Backend Developer**.
