LinkedIn: <https://www.linkedin.com/in/mahesh-tiwaree/>

Certified Salesforce Developer with 2.3+ years of experience in designing custom solutions on the Salesforce Lightning platform. Skilled in Sales Cloud, Apex, Lightning Web Components (LWC), Batch Apex, and integration best practices. With a background in full-stack development for 1.6 years (React.js, Node.js, NoSQL), I bring a well-rounded approach to Salesforce development, combining technical precision with problem-solving expertise. Eager to contribute to dynamic teams and drive impactful results.

AREA OF EXPERTISE

Salesforce.Com | Salesforce Apex | Salesforce Lightning | Salesforce Sales Cloud | Lightning Web Component (LWC) | Aura components | Visualforce | SOQL | REST API | HTML | JavaScript | Salesforce Packages | Batch Apex | Apex Trigger | Salesforce Admin | Integration | Test Classes | Web Services | Work Flows

WORK EXPERIENCE SUMMARY

Salesforce Developer | Algoworks, Noida, Uttar Pradesh, India

Mar 2023 - Present

- Developed and maintained custom solutions on the Salesforce lightning platform, utilizing Apex, Batch Apex, Trigger, Flows, LWC, Visualforce.
- Collaborated with stakeholders to gather requirements and successfully delivered projects resulting in improved efficiency and user satisfaction.
- Optimized Sales Cloud implementation by integrating Salesforce with an external system.
- Designed and developed an automation process using Batch Apex for getting external system data to salesforce.
- Developed Lightning Component displaying real-time data.
- Designed and executed test scripts for system upgrades, ensuring data integrity.
- Created Objects, fields, Custom settings, Custom Tabs, Custom Buttons, Custom Apps, page layouts, workflow rules, validation rules, page layouts, and Relationships.
- Developed various Apex Classes, Batch Apex, Triggers, Controller classes, and methods for functional needs in the application compatible with lightning.
- Created various Managed and Unmanaged packages for the clients.
- Used the sandbox for testing and migrated the code to the deployment instance after testing.
- Create profiles, and roles and configure permissions according to organizational hierarchy requirements.
- Creating SFDC reports (functional and technical documents).
