May 2022 -present

Project 1: Event and Donation Management System for a Charity Organization

Description:

As a Non-Profit Service Provider for a Church Organization in the United States, we offer essential services to donors and event organizers. Our mission focuses on delivering on-demand support for homeless individuals and families, as well as providing insurance services in the areas of health and education. We prioritize transparency, striving to offer a seamless end-to-end service experience.

Roles & Responsibilities:

- Collected and analyzed business requirements to identify key needs.
- Designed and implemented comprehensive forms aligned with business objectives.
- Created and maintained custom objects, fields, formulas, validation rules, and Flows.
- Proposed system improvements and modifications to enhance performance, streamline business processes, and optimize reporting.
- Developed Apex Classes and Test Classes to ensure robust code coverage.
- Executed data migration tasks and addressed production issues.
- Worked closely with the manager to define project scope and timelines.

Project 2: Loan and Credit Management Solution for a Financial Institution

Project Overview

As a Salesforce Developer, I was tasked with implementing solutions to enhance sales, customer relationship management (CRM), and financial services processes for a banking organization. The primary goal of the project was to improve customer experience, operational efficiency, and sales productivity.

Roles and Responsibilities:

- Configured Salesforce Sales Cloud by setting up custom objects, fields, and automation processes to ensure data accuracy.
- Developed custom Apex classes, triggers, and Lightning Web Components tailored to meet specific business needs.
- Integrated external systems for efficient data exchange and automated workflows.
- Collaborated with UX/UI designers to create user-friendly interfaces for banking personnel.
- Performed comprehensive testing, including unit, integration, and user acceptance testing, to ensure the functionality of the system.
- Managed deployment of changes across various environments using Salesforce Change Sets and Salesforce DX.
- Delivered training and support to end-users, ensuring seamless adoption and efficient use of the Salesforce platform.

2. Maa Renuka Construction

April-2021 to Jan -2022

- Successfully managed the planning, execution, and completion of [specific project type], ensuring adherence to deadlines, budgets, and quality standards.
- Prepared accurate material requirements and cost estimates, optimizing resource allocation and reducing project expenses by [percentage or amount].
- Coordinated with teams to complete projects efficiently and within deadlines.
