Having more than 2 years of experience in designing, developing, and implementing customized Salesforce solutions to drive business success. Proficient in Apex, Visualforce, Lightning Web Components, and Salesforce integrations, with a strong track record of streamlining business processes and enhancing user experience.

EXPERIENCE

CRM Landing Software Pvt Ltd, Ajmer, Rajasthan.

— *Salesforce Developer*

October-2022 - PRESENT

EDUCATION

Priyadarshini Institute of Engineering and Technology, Nagpur, Maharashtra.

— *Bachelor of Engineering*

Aug-2015 - June-2018

ROLES AND RESPONSIBILITIES

- Develop and implement Apex classes, triggers, and batch processes to automate business processes.
- Design and create Lightning Web Components for responsive user interfaces.
- Customize Salesforce Lightning Pages, Record Pages, and App Builder components.
- Configure custom objects, fields, page layouts, validation rules, and workflow rules.
- Build and maintain custom reports, dashboards, and analytics for stakeholders.
- Implement security controls, roles, profiles, and permission sets for data integrity.
- Integrate Salesforce with external systems using REST, SOAP APIs.
- Utilize tools like Data Loader, Workbench, and Salesforce Inspector for data management.
- Participate in code reviews, testing, and quality assurance processes for code quality.
- Perform deployments using change sets to move configurations and code between environments.

SKILLS

- Lightning Web Component (LWC)
- Apex - (Synchronous, Asynchronous)
- Integration- (REST API, SOAP API)
- Debugging
- Visualforce
- SOQL/SOSL
- Deployment
- Lightning Flows
- Field Service Lightning (FLS)
- Sales Cloud
- Service Cloud
- Experience Cloud (Community Cloud)
- Salesforce Admin
- Salesforce Development
- Reports & Dashboards
- Demo to Customer

CERTIFICATIONS

Salesforce Certified
Platform Developer-I.

LANGUAGES

English, Hindi, Marathi.

PROJECT HISTORY

Project Name : Razorpy

Description: Razorpay is an India-based, fintech company that provides payment gateway services to vendors, merchants and e-commerce platforms. It is an online system that is designed to handle end-to-end payments that can also be integrated with different websites and apps.

Key Responsibilities:

- Developed triggers and validation rules to maintain data integrity.
- Enhanced Lightning Components for improved user experience.
- Analyzed requirements and executed solutions using Lightning Web Components.
- Prepared documentation and conducted internal demos.
- Proposed and implemented customizations using Apex and Lightning Web Components.
- Ensured high code coverage and smooth deployments.
- Implemented error handling and integration with external systems for seamless operations.
- Converted multiple Process Builder and Workflow to Flow.
- Facilitated deployment to production and provided Go-Live support, ensuring a smooth transition and minimal disruption to business operations.

Project Name : Lohia Corp

Description: Lohia Corp Limited is the flagship company of the Lohia Group and a global supplier of machinery for end-to-end solutions for plastic woven fabric industry used for packaging systems for solid bulk materials and infrastructure applications. That system we have automated from ordering, installation and maintenance.

Key Responsibilities:

- Implemented dynamic business PDF generation based on specified conditions, enhancing document generation efficiency.
- Configured workflows, including objects, custom apps, layouts, tabs, validation rules, workflow rules, approval processes, and sharing rules, to automate processes and enforce business logic.
- Analyzed requirements and executed solutions using Lightning web components.
- Developed standard and custom community pages to enhance collaboration and engagement with internal employees and end customers.
- Prepared comprehensive documentation and conducted demos to facilitate internal training and educate end customers on system functionalities.
- Proposed optimal designs for Use Case requirements and executed customizations using Apex and Lightning Web Components to meet specific business needs effectively.
- Ensured high code coverage and seamless deployments to Production environments.
- Implemented error handling mechanisms using JavaScript functions within Lightning components to improve system reliability and user experience.

Project Name : Balaji Wafers Pvt. Ltd.

Description: Balaji Wafers is a snack food manufacturer and distributor in India. It produces and distributes a variety of potato chips and other grain-based snack foods.

Key Responsibilities:

- Implemented dynamic business PDF and Excel File generation based on specified conditions, enhancing document generation efficiency.
- Configured workflows, including objects, custom apps, layouts, tabs, validation rules, workflow rules, approval processes, and sharing rules, to automate processes and enforce business logic.
- Analyzed requirements and executed solutions using Lightning web components.
- Developed standard and custom community pages to enhance collaboration and engagement with internal employees and end customers.
- Proposed optimal designs for Use Case requirements and executed customizations using Apex and Lightning Web Components to meet specific business needs effectively.
- Ensured high code coverage and seamless deployments to Production environments.
