

Sagar Jat

Salesforce Developer

About Me

Aspiring Salesforce Developer with a strong foundation in Apex, LWC, and Salesforce Administration. Eager to apply my skills and passion for learning to build efficient solutions and contribute to impactful projects.

Skills

- Proficient in customizing Sales and Service Cloud to enhance business processes.
- Skilled in developing Apex triggers, controllers, and asynchronous logic like future method, batch apex & scheduled apex.
- Experienced in creating user-friendly interfaces with Lightning Web Components (LWC). While utilizing LDS for data CRUD operations.
- Skilled in designing REST api for salesforce integration for CRUD or custom operations.
- Adept at streamlining processes using Flows, Process Builder, and Approval Processes.
- Skilled in configuring Profiles, Roles, and Permission Sets for secure access control.
- Proficient in managing custom objects, relationships, and validation rules.
- Experienced in writing optimized SOQL and SOSL queries for efficient data handling

Personal Project

Recruitment Portal :

- **Data Modeling & Validation:** custom objects with fields, relationships and validations to optimize recruitment.
- **Related Application in Filtered View:** Datatable to display job-specific applications on the job console.
- **Optimized Application Management:** Implemented a dynamic datatable with application creation, inline editing, and filtering for efficient record management
- **Apex Triggers and Controllers:** Leveraged Apex triggers to maintain data integrity and Apex controllers for dynamic data processing and management
- **Approval Process:** Automated multi-level approvals for the job creation Process.
- **Flows :** Used record flows to automate processes and Screen flows to enhance user interactions.
