PROFESSIONAL EXPERIENCE

Salesforce Developer The Web Logics

05/2024 - Present

- Proficient in Salesforce Data Modeling, Sales & Service Cloud, Process Automation, Data Security, Custom Reports & Dashboards, and Field-Level Security
- Extensive experience with DML Operations, Database Class, Apex Triggers, Governor Limits, and Asynchronous Apex such as Batch Apex, Future Methods, Queueable Apex
- Enhanced user experience by building dynamic, responsive Salesforce applications using (LWC) Lightning Web Components and Javascript
- Improved data security by implementing object, field, and record level security and managing Salesforce users, roles, profiles, and permissions
- Hands-on experience with Salesforce API Integrations, including RESTful API, API Callout (Twilio, Stripe) integrations using Postman and Workbench
- Managed data effectively by using Data Import/Export tools - Data loader, data wizard, and performing SOQL, SOSL, and SQL Server queries
- Provided actionable insights by creating insightful Reports and Dashboards to visualize data and track performance

Associate Software Developer Infoshore

01/2023 - 05/2024

- Automated repetitive support tasks by developing and implementing scripts, reducing manual effort by 40% and improving operational efficiency
- Designed and integrated RESTful APIs to facilitate seamless communication between the frontend & backend, ensuring efficient data synchronization and system integration
- Supported database migration and version upgrades, implementing strategies to ensure minimal downtime and a smooth transition for end-users
- Monitored database performance and conducted query optimization, including indexing & routine maintenance, for SQL and MySQL environments to enhance system reliability
- Contributed to the development of an eBay Importer Application using PHP, Laravel, and REST APIs, enhancing bulk product management through eBay SDK integration
- Optimized SQL queries to support the creation of data analytics dashboards, ensuring efficient reporting and actionable insights

Web Developer Webdomnet

12/2021 - 12/2022

- Customized Shopify themes and integrated third-party apps to enhance functionality and user experience
- Optimized website performance through improved SEO strategies and faster page load speeds, leading to increased site responsiveness
- Developed and optimized custom web applications with a strong focus on UI/UX design, API integrations, and overall performance enhancement.
