SKILLS

Lightning App Builder Security: Object Level Security Field Level Security Record Level Security.

Administration : Customizing Objects, Fields, and Relationships Page Layouts, Search Layouts, Record Types Workflows, Validation Rules, and Assignment Rules Process Builder and Approval Processes Reports and Dashboards Org Hierarchy, Roles, Profiles, and Permission Sets.

Development : Apex Classes and Triggers Visualforce Pages and Controllers Batch Apex Sharing Rules.

Data Management : Data Import/Export using Data Loader Data Migration and Data Integration.

Programming Languages : Apex SOQL (Salesforce Object Query Language) Salesforce.

Projects Profile

Project Name : [Learning Application \(Education\)](#)

Roles and Responsibilities :

- Create Flow, Workflow rule, Process Builder, Approval process.
 - Create multiple custom objects, fields, , Custom tabs, and validation rules.
 - Creating Users, Profiles, Role, maintaining Role hierarchy.
 - Create Salesforce Report and Dashboard.
 - Developed and configured various Reports and Report Folders for different user profiles based on the need in the organization.
 - Provided L2 and L3 support to Sales and Service cloud
 - Validate the Dashboard data with the Heroku DB Data
-

Technical Skills

Proven track record in Salesforce development, including the creation of **Apex classes, triggers, Visualforce pages**, and contributing to the overall customization and optimization of Salesforce solutions.

Skilled in integrating Salesforce with external systems **using REST and SOAP apis**, along with expertise in data loading techniques through tools like **Data Loader**, ensuring seamless data flow across the Salesforce ecosystem.

Basic understanding of web technologies such as **HTML**, **CSS**, and **javascript**, enabling the creation of dynamic and visually appealing user interfaces within the Salesforce platform.

Proficient in **customizing Salesforce objects, fields, and relationships**, along with expertise in **configuring page layouts, search layouts, and implementing workflow automation, validation rules, and assignment rules**.

In-depth knowledge of **Salesforce security**, features including the **creation of profiles, roles, users, and Permission sets**, ensuring a robust and controlled access model for data and functionality.

Skilled in data management tasks, including data **import/export** using tools like **Data Loader, data migration, and Integration**, ensuring the accuracy and consistency Of data within the Salesforce platform.

Expertise in t, including unit testing withtesting **methodologies Apex (Test Classes), system testing, and user Acceptance testing (UAT)**, ensuring the reliability and functionality of Salesforce solutions.

Experience working within the **Agile development methodology**, demonstrating adaptability and collaboration in fastPaced and iterative development environments.

Proficient in utilizing **Lightning App Builder** to design and **create custom applications**, streamlining the Development process and enhancing **user interface customization**.

Hands-on experience with **Lightning Data Service**, ensuring efficient and consistent access to data within **Lightning components**, contributing to improved performance and user responsiveness.

Strong grasp of **Object-Oriented Programming (OOP) concepts**, facilitating the creation of **modular and scalable Apex code** for complex business logic requirements.

Educational/Academic Qualification

Bsc in PAHSU , Solapur.2023

Employment History

Currently Working as a software developer at Opus Technologies, Pune from July 2023- till date.
