

HARSHVARDHAN NARODE

SALESFORCE DEVELOPER

✉ narodeharshvardhan@gmail.com ☎ 7620278877 📍 Pune 🔗 My Portfolio 🌐 LinkedIn Profile

PROFILE SUMMARY

3X Salesforce Developer with 3 years of experience in building and customizing Salesforce solutions. Skilled in Apex, Lightning Web Components, Flows and integrating third-party APIs. Proficient in Salesforce administration, data integration, and process optimization. Driven to deliver high-quality, scalable solutions that meet business needs and enhance system performance.

PROFESSIONAL EXPERIENCE

Persistent System Ltd, Software Engineer

Jun 2022 – Nov 2024 | Pune

- Streamlined day-to-day operations by creating **workflow rules, approval processes**, and process builders, increasing business efficiency by 35% and reducing manual intervention by 25%.
- Established a series of automated **flows** in Salesforce that increased data processing speeds by 30%, allowing teams to focus on high-priority tasks and resulting in a measurable increase in output quality.
- UI Enhancements: Developed **Lightning Web Components (LWC)** for various screen elements within Salesforce flow, significantly improving the user interface and user workflow execution time by 30%.
- Engineered **Apex triggers** and handler classes to automate critical business logic, resulting in improved data consistency across 15+ custom objects while enhancing system automation effectiveness for key processes within Salesforce.
- Implemented complex Apex logic to handle bulk data processing and integrate with external systems using asynchronous methods like **Batch Apex** and **Queueable Apex**, improving data processing efficiency by 40%.
- Integrated Salesforce** with third-party systems using **REST APIs**, enabling seamless data synchronization and improving cross-platform communication.
- Utilized **SOQL and SOSL** queries to optimize data retrieval processes, significantly improving search efficiency and reducing query execution time by 25%, while ensuring accurate and fast access to critical information across Salesforce objects.

Persistent System Ltd, Academic Intern

Dec 2021 – May 2022 | Pune

- Implemented enhancements in Salesforce: **custom objects, field setup, workflow automation, email alerts, templates**, and UI improvements.
- Established relationships and junction objects for **roll-up summary fields** to improve data insights.
- Designed and effected **approval processes** for efficient application development workflows.
- Streamlined business processes, enhanced data management, and enhanced user experience.
- Demonstrated proficiency in **Salesforce administration and development**, optimizing system performance.

PROJECTS

My Portfolio

- <https://harsh-domain-dev-ed.trailblaze.my.site.com/> 🔗

Weather App

- <https://harsh-domain-dev-ed.trailblaze.my.site.com/weather-app> 🔗
- The Salesforce Weather App uses an **Apex callout** to fetch **real-time weather data** from an **external API** based on the user's city, with the Apex class returning the details to the LWC for display

NoteTaking App

- <https://harsh-domain-dev-ed.trailblaze.my.site.com/note-taking-app> 🔗
- Created a Salesforce note-taking app using LWC for the frontend, **Apex for backend logic**, and **DML operations to save, retrieve, and manage notes in a custom object**, enabling efficient note management.

SKILLS

Salesforce, Salesforce Admin, Apex, Triggers, Lightning Web Component (LWC), Flows, SOQL, SOSL, Batch Apex, Scheduled Apex, Javascript, HTML, CSS, Approval Process

CERTIFICATIONS

- Salesforce Administrator
- Salesforce Platform Developer 1
- Salesforce Data Cloud Consultant

EDUCATION

Vishwakarma Institute of Information Technology,

2018 – 2022

Bachelor of Technology (BTech)

Computer Enginnering

9.04 CGPA
