- Knowledge of Salesforce limits and best practices for system performance.

Worked as Salesforce Developer for 2.5 Years in Finexus Inc.

■ **Project #1:**

- Project type: Financial services company
- Client: Credit Works (US Based)
- Role: Salesforce developer

Duration: July 2022 to December 2022

Description: Credit Works is a financial technology company that provides simplified money solutions to Americans.

Work Description: Played a key role in implementing Salesforce administrative and development functions for Credit Works.

- Developed various classes/triggers to implement the business logic.
- In the design and development of user interface for the customer in the customer portal.
- Creation of validation rule, matching rule, formulae fields, record trigger flow and test classes.
- Provide support to team in technical/functional issues.

Worked On: Apex data loader, Apex Batch classes, Apex Classes, Work flow, Triggers, Deployment (Change Set) etc.

■ **Project #2:**

- Project type: Financial services company
- Client: Spring Financial (Canada Based)
- Role: Salesforce Developer
- Duration: January 2023 to March 2023

Description: Spring Financial is a leading financial technology company that provides all Canadians with simplified money solutions to help build credit, save money and borrow responsibly.

Work Description and Responsibilities: I have been involved in the configuration and customization of Salesforce.com and its user interface. My key responsibilities include:

- Developing and maintaining Batch Classes, Lightning Web Components, and Apex classes.
- Creating and assigning permission sets to specific users.
- Fixing and optimizing page layouts and Lightning record pages.
- Providing technical and functional support to the team, addressing and resolving issues promptly.
- Playing a key role in creating payment functionality for users, which included backend logic as well as user interface development.

Worked On: Lightning Web Component, Platform Event, Apex Trigger, Apex Classes, Batch Classes, Screen Flow, Record Triggered flow and Test Classes.

■ **Project #3:**

- Project type: Banking
- Client: Ascendus
- Role: Salesforce Developer
- Duration: April 2023 to December 2023

Description: Ascendus is a nonprofit small business lender working to create economic opportunity by providing entrepreneurs with access to the capital and the business support they need to create and grow healthy enterprises and contribute to thriving local economies. Since 1991, Ascendus has provided more than \$200 million to 25,000 small businesses owners across the country.

Work Description and Responsibilities: I was involved in developing an integration between WordPress and Salesforce, as well as working on Apex classes, validation rules, Skuid pages, and batch classes.

- Provided estimates to the client.
- Led the development of an integration between WordPress and Salesforce, ensuring seamless data flow and synchronization.
- Designed, developed, and maintained robust Apex classes to support various business processes and functionalities.
- Created and implemented complex validation rules to enforce data integrity and business logic.
- Developed and customized Skuid pages to enhance user experience and interface functionality.
- Designed, executed, and managed batch classes to handle large data volumes and automate repetitive tasks efficiently.

Worked On: Apex Trigger, Apex Classes, Batch Classes, Salesforce flow, Workflow, Integration and Test Classes.

■ **Project #4:**

- Project type: Banking
- Client: Capital Good Fund
- Role: Salesforce Developer
- Duration: January 2024 to Present

Description: Capital Good Fund is a nonprofit, certified Community Development Financial Institution that believes in equitable financing for all. Is currently offer financing in Rhode Island, Florida, Massachusetts, Illinois, Delaware, Texas, Colorado, New Jersey, Connecticut, Georgia and Pennsylvania.

Work Description and Responsibilities: This project involves contributing to the development of new features, bug fixing, and implementing enhancements suggested by the client.

Worked On: Lightning Web Components, Apex Trigger, Apex Classes, Batch Classes, Salesforce flow, Workflow, GitHub and Test Classes.
