-

Project 1: Real Estate Management Custom App in Salesforce

Client → Main Street equity Corp(Calgary Canada)

- Developed and administered a Salesforce CRM solution for a leading real estate organization.
- Designed the application, worked on lead management processes, and customized standard objects including
- Leads, Accounts, Contacts, and Opportunities.
- I created custom objects to store organization data as per business requirements.
- Customized Page Layouts, Field Level Security, Organization Wide Defaults and Sharing rules, Profile Settings,
- Validation rules, and Workflows.
- Developed Triggers using Apex programming and created customized Visualforce pages using standard and custom controllers.
- Worked extensively on the implementation and customization of the business model.
- Imported and exported records using the Data Loader and developed code coverage test classes for migrating
- code to the production environment.

Project 2: Loan Collection Applications for NBFC

Client → Flexiti financial(Taranto, Canada)

- Created the custom applications for loan management.
 - Enhanced Salesforce functionality through configuration of Page Layouts, Field Level Security, Organization
 - Wide Defaults, Sharing rules, Profile Settings, Validation rules, and Workflows.
 - Developed custom Apex Triggers and Visualforce pages to automate processes and improve user experience.
 - Successfully implemented and customized the business model to meet organizational needs.
 - Utilized Data Loader for efficient data migration and created Apex test classes to ensure code quality and readiness for production.
-

Project 3: Policy Administration System

- Led the development and implementation of a Salesforce-based policy administration system for a major insurance provider.
 - Designed the application architecture to streamline policy creation, underwriting, and issuance processes.
 - Customized standard objects (Accounts, Contacts, Policies, Claims) and built custom objects for policy details, endorsements, and premium calculations.
 - Enhanced Salesforce security and data integrity through configuration of Page Layouts, Field Level Security, Sharing rules, Validation rules, and Workflows.
 - Developed Apex Triggers and Visualforce pages for policy automation, underwriting calculations, and document.
-

Education:
