♣ PROJECT EXPERIENCE

Telefonica O2 Business customer Portal Enhancement

Role :- Salesforce Developer

• Delivered a range of functionalities customized to meet client requirements.

• Led the transformation of the O2 Business customer portal, driving functional improvements and operational efficiency. Collaborated extensively with business stakeholders to identify pain points and implemented tailored Salesforce solutions to address critical issues

• Applied an array of collaboration technologies, including Apex, Visualforce, and Lightning Components, to enhance the portal's functionality and user experience

• Integrated Salesforce with external systems AI using RESTful APIs, ensuring real-time data synchronization and e-commerce fostering improved communication across O2 Business platforms sales.

• Discovered root causes of problems and identified appropriate solutions.

♣ CERTIFICATIONS

Salesforce Associate
Salesforce Administration
Salesforce Certified Platform Developer I
B2B Commerce for Administrators
Accredited Professional

♣ RESPONSIBILITIES

• Configured and customized Salesforce components, ensuring on-time **development, deployment,** and adherence to regulatory standards for optimal organizational performance.

• Created and configured standard and custom objects, including Account, Contact, and Opportunity, to capture and manage essential business data.

• Managed administrative tasks within Salesforce, including user access, system settings, and overall environment maintenance.

• Developed and managed **profiles, permission sets, role** hierarchies, and sharing settings to control user access and ensure appropriate data visibility.

• Implemented business logic using **Apex classes and asynchronous Apex (batch processing, scheduled Apex)**, and developed test classes to maintain high code quality.

• Performed data manipulation with **SOQL**, **SOSL**, and **DML** operations, adhering to governor limits for efficient data handling.

• Developed Lightning Web Components (**LWC**) and **integrated** Salesforce with external systems via REST API to meet business needs.

• Created Lightning components and executed Apex callouts through **REST API** for seamless external service integration.

• Defined and managed lookup and master-detail relationships to ensure accurate data modeling and relationship management.

• Provided ongoing support for Salesforce operations, ensuring smooth functionality and high user satisfaction.

♣ DECLARATION

I here by declare that the above written particulars are true to the best of my knowledge and belief.
