## SOFT SKILLS

- Problem-solving and analytical thinking
- Effective communication and collaboration
- Agile and Scrum methodologies
- Time management and multitasking

## PROFILE SUMMARY

Result-driven Salesforce Developer with experience in BFSI domain. With 2 years of experience, proficient in developing, customizing, and optimizing Salesforce applications. Skilled in Apex, Visualforce, Lightning components, and API integrations. Collaborative team player committed to delivering secure and scalable solutions.

## WORK EXPERIENCE

**Extentia Information Technology**          Feb 2023 - PRESENT
Associate Software Engineer

- Worked on a Salesforce-based Loan Origination System (LOS) for a major financial services client, being one of the biggest Salesforce implementation globally, customizing Salesforce functionalities to streamline loan processing from application submission to disbursement.
- Collaborated with business analysts, project managers, and loan officers to gather detailed requirements for automating loan origination processes, ensuring compliance with banking regulations.
- Task Allocation & Estimation: Handled task allocation and sub-tasking for development work within the team, providing high-level estimates for project timelines and deliverables. Ensured optimal resource management and clear task ownership.
- Developed custom Apex triggers, classes, and Visualforce pages to handle loan eligibility, underwriting, approval workflows, and document management within the Salesforce system.
- Develop, maintain, create, and improve validation rules, custom workflows, Visualforce pages, Apex customizations, custom objects, fields, and formulas
- Built Lightning Web Components (LWC) to enhance user experience for loan officers, enabling them to efficiently manage customer interactions, application reviews, and approval processes.
- Integrated Salesforce with third-party credit scoring services and financial databases using REST APIs, allowing automated real-time credit checks and customer risk assessments.
- Utilized custom objects, custom metadata types, custom settings, and custom labels extensively to create a highly configurable system, allowing for easy customization and scalability without the need for code changes.

## WORK EXPERIENCE

**Extentia Information Technology**     Feb 2023 - PRESENT

Associate Software Engineer

- Worked extensively on identifying and resolving critical bugs in customizations, integrations, and workflows. Collaborated with QA teams to address defects and deliver high-quality, error-free solutions in both sandbox and production environments.
- Managed deployments using CI/CD pipelines with Azure DevOps and Salesforce DX (SFDX), ensuring smooth and efficient deployments across different environments.
- Actively participated in after-hours production deployment calls and performed sanity checks post-deployment to ensure system stability and functionality.
- Provided training to loan officers and financial teams on the Loan Origination System, leading to faster adoption and improved loan processing times.
