Objective:

Skilled Salesforce Developer with 2 years of experience in developing custom solutions on the Salesforce Sales Cloud and Service Coud platforms. Expertise in Apex development, Lightning Web Component (LWC) and Visualforce. Strong Hands-on experience in Salesforce Configuration (custom objects, fields, workflows, and automation) and Salesforce Communities. Proven ability to integrate external APIs, build and maintain REST APIs, and develop robust applications within the Salesforce platform.

Professional Experience:

Working as a Software Engineer in LTI Mindtree from April 2021 to the current month.

Professional Summary:

- Over 3.5 years of IT industry experience as a Software Engineer in different environments.

- Skilled in understanding Software Requirement Specification.

- Built and deployed Lightning Web Component (LWC) to create dynamic, reusable components, enhancing user experience and streamlining processes.

- Developed and optimized Visualforce pages for custom UI components when LWC was not feasible, ensuring a seamless user experience.

- Deliver high quality work that meets expectations for timelessness, accuracy, and completeness.

- Exposure to SDLC requirements gathering, product development, maintenance, testing and project management techniques in Agile methodology.

- Involved in participation of regular weekly project status meetings to discuss the risks involved in ongoing projects with Teammates and Team Lead.

Technical Skills:

- **Salesforce Technologies**: Apex, Lightning Web Components (LWC), Visualforce, Triggers, Lightning App Builder.

- **Salesforce Clouds**: Sales Cloud, Service Cloud.

- **Programming Languages:** Apex, Java, JavaScript, HTML, CSS, SQL, SOQL, SOSL.

- **Tools:** Salesforce Developer Console, Workbench, VS Code, Postman, JIRA, Salesforce AppExchange.

- **Version Control & CI/CD**: Git, GitHub.

Project Profile:

Salesforce Developer

LTIMindtree-Bangalore

Responsibilities:

- Involved in the requirement gathering, analysis and design phases to participate in implementation.
- Build custom Dashboard using Lightning Web Component (LWC) for sales reps to track opportunities, forecasts, and quotas.
- Designed, developed, and deployed customized solutions within the Salesforce platform using **Apex** and **Lightning Components** to meet client requirements, improve business processes, and meet organizational goals.
- Utilized **Salesforce Lightning UI** to build modern, responsive user interfaces and integrate them with external systems through **Salesforce Lightning Connect**.
- Assisted in the development and customization of **Salesforce CRM** solutions by leveraging **Salesforce configuration** tools (flows, process builder) and **Apex** code.
- Created and enhanced custom **Apex** classes and triggers to automate data processing between systems.
- Improved data processing and system functionality by troubleshooting, debugging, and optimizing existing Salesforce applications.

CERTIFICATIONS:
- Salesforce Certified App Builder
- Salesforce Certified Platform Developer I (In progress)
