PROJECTS

Bid Management

- **Gathering and analyzing business requirements.** That would need to work with stakeholders to understand their business requirements, pain points, and desired outcomes. This would involve documenting functional and technical requirements and developing a clear understanding of the project scope.
- **Designing and building custom solutions:** You would be responsible for designing and building custom solutions on the Salesforce platform to support the loan application and approval process. This could include developing custom objects, fields, flows, and reports to track loan applications, credit scores, and loan disbursements.
- **Ensuring that the loan management system meets industry standards for data security, compliance, and privacy.**
- **Integrating with external systems.** That would need to integrate the loan management system with external systems, such as credit scoring tools, payment gateways, and loan servicing platforms. This could involve developing custom APIs and integrating with third-party APIs.

Bid Integrations

- **Worked as team member and performed the roles of Salesforce Developer in the organization.**
- **Contributed to the development of Salesforce solution - Cloud Console Application for tracking and resolving customer inquiries, meeting project scope and client expectations**
- **Involved in the requirement gathering and creation of High and Low-level Design document.**
- **Involved in the setup of the application, standard objects and processes**
- **Creating Process Builders, Workflow and Triggers for various business requirements**
- **Created a Commission Approval process based on the Agent and Sales Manager.**
