Projects

1. DeepGriha Society

Description: Developed a client portal for donors and volunteers using Salesforce to manage records, send certificates and newsletters, and run campaigns. Integrated the system with Razorpay and Mailchimp.

Technologies: Apex, LWC, Flows, Visualforce Pages, Aura Components, Salesforce.com

Team Size: 1

Responsibilities:

- Created LWC components and custom objects.
- Developed Apex Controllers to handle payloads and metadata.
- Built Visualforce Pages and automated processes using Flows.
- Integrated the platform with Mailchimp to enhance collaboration.

2. KAAML Wealth

Description: Built a secure portal for external stakeholders, enabling collaboration between investors and portfolio companies.

Technologies: Apex, LWC, Flows, Salesforce.com

Team Size: 4

Responsibilities:

- Designed and developed LWC components and custom metadata types.
- Implemented Apex Controllers for processing metadata.
- Configured validation rules and formula fields to meet business logic.

3. Merchant Onboarding

Description: Developed a Salesforce-based app for POS machine applications and metadata-driven backend decision automation.

Technologies: Apex, LWC, Flows, Salesforce.com, External APIs

Team Size: 3

Responsibilities:

- Built dynamic LWC components and approval processes.
- Configured custom metadata, validation rules, and formula fields.
- Automated task creation and assignment processes.

---

4. Blood Portal

Description: Created a blood donation management portal allowing users to book donations, search blood availability, place orders, and track order statuses.

Technologies: Apex, LWC, Flows, Visualforce Pages, Aura Components, Salesforce.com
Team Size: 1

Responsibilities:

- Designed custom objects, workflows, approval processes, and email alerts.
- Developed asynchronous Apex classes and VF pages.
- Migrated data using Data Loader and implemented test case scenarios.

---

5. Parental Support

Description: Developed a custom app for tracking and managing child support payments and shared expenses.

Technologies: Apex, Visualforce, Triggers, Salesforce.com

Team Size: 1

Responsibilities:

- Created custom objects, validation rules, and workflows.
- Developed triggers and custom controllers for data handling.
- Configured roles, sharing rules, and page layouts.
