SUMMARY

I am a former engineer turned UX designer passionate about creating intuitive and visually appealing products. With extensive experience in B2B SaaS product design, I focus on delivering exceptional user experiences that are both functional and engaging. My collaborative approach allows me to translate complex requirements into design solutions that enhance usability and interaction.

EXPERIENCE

Product Design Consultant   02/2024 - Present

Freelance

- Designed user-friendly interfaces for a data observability platform, enhancing usability and engagement
- Collaborated with cross-functional teams to translate complex requirements into intuitive designs
- Designed seamless, user-centric interfaces for an AI-powered enterprise search platform

Senior UX designer   12/2022 - 01/2024

Adroitent ITES | Oracle Healthcare

- Served as a consultant at Oracle Health, formerly Cerner Corporation.
- Designed and prototyped various products within the Revenue Cycle business group, ensuring they met diverse business requirements
- Improvised a range of products, including health insurance data dashboards, patient risk alerts, and patient demographics dashboards
- Managed high-risk projects, designing products compliant with CE marking standards, ensuring adherence to European safety, health, and environmental protection regulations

UX designer   01/2021 - 10/2022

Inviz AI Solutions

- Spearheaded the redesign of the data labeling software called LOOPR, incorporating new requirements and functionalities to enhance its performance and usability
- Developed a sophisticated searchandising platform for a major e-commerce company, empowering the support team to refine search results and effectively monitor performance statistics.
