Professional Summary

Dynamic and results-driven Salesforce Developer with 2 years of experience specializing in Salesforce customization, LWC, and Apex development. Proven ability to design, develop, and implement scalable Salesforce solutions, enhancing system functionality and user experience. Skilled in client communication, team collaboration, and delivering high-quality solutions aligned with business objectives.

Technical Skills

Salesforce Development: Apex Classes, Triggers, LWC (Lightning Web Components), Aura Components, Visualforce Pages
Integrations: REST/SOAP APIs, Platform Events, GraphQL
Automation: Flows
Tools: Data Loader, Workbench, VS Code, Force.com IDE
Database & Query: SOQL
UI Design: Salesforce Lightning Design System, Bootstrap, jQuery
Languages: Java, PHP

Work Experience

Salesforce Developer
Kriit Technologies Pvt. Ltd., Surat
January 2023 – Present

- Designed and developed custom LWC solutions to enhance system functionality for diverse projects.
- Implemented SOAP and REST-based integrations, enhancing data synchronization and reliability.
- Optimized legacy AURA component code to meet new business requirements, enhancing processing efficiency and system performance.
- Collaborated with cross-functional teams to deliver Salesforce solutions aligned with client objectives.
- Developed and executed batch apex and scheduled apex to automate data processing tasks.

Key Projects:

MAF – Real Estate and Leasing Domain

- Developed Apex classes, triggers, and LWC components for system enhancements.
- Created and maintained custom metadata, labels, and settings for better configuration management.
- Worked on integration processes using SOAP and REST APIs.

Zo-Skin Health Care

- Designed multi-language forms in Salesforce using LWC to enhance global accessibility.
- Developed platform events to streamline real-time communication with external systems.
- Implemented validation rules, conditional visibility, and file upload capabilities for enhanced form usability.

Dementia Singapore's Agency

- Built custom objects, fields, and page layouts, ensuring alignment with project requirements.
- Designed an LWC-based form with dynamic input fields and integrated data submission functionality.
- Utilized Visualforce to dynamically generate PDF documents for user-submitted data.

Coca-Cola Europacific Partners

- Developed dynamic data tables using LWC for a user-friendly interface.
- Integrated GraphQL for efficient data querying and synchronization.
- Created comprehensive test classes to ensure robust and error-free functionality.
